

Landscape Features

This list is by no means complete but does include the more important landscape features identified by a brief field survey. A more systematic survey both on the ground and from documentary sources would identify many more local features of landscape interest (hedges, trees, ponds, roadside verges etc.).

- | | | |
|-----------|-----------------------|---|
| T1 | Lime Kiln Farm | Old chalk quarry cut into hillside and surrounded by trees. Just to the east of low spur of ground with scrub bush vegetation. |
| T2 | The Grove | Best of mixed deciduous trees along west flank of Easthaugh Hill. Prominent landscape feature formerly known as Kings Wood. |
| T3 | | Sunken lane between steep, wooded banks, sloping down to Cadder's Hill. |
| T4 | Cadder's Hill | Spur of high ground on south flank of Wensum Valley with belt of beech trees (approximately 100 years old) on north west slope. Prominent landscape feature threatened by erosion caused by motorcycle scrambles. |
| T5 | The Riverside | Large well-wooded areas - mainly willows and alders around the weir and mill house and mature, specimen trees in grounds of Old Rectory. |
