Stop Press: Fast Broadband Deal Secured for Lyng Area

[Norfolk Broadband Strategy Document](#)

Panoramic photo of the pole site overlooking the village - wifi broadcast will be 12m above ground level.

We are there with Rapid Waters!

Norfolk C C have stood down to allow a commercial company , Rapid Waters Ltd, to look into providing broadband for Lyng. They are b and have purchased capacity from BT. The scheme originated by County should move forward quicker and provide a similar service w 18 meg or even to 30 megs - a 10 times increase in speed!

FAQs

What is it?

The scheme will be wifi from a pole as the original plan. Fibre will be blown down the Lyng Rd using BT ducts from the cables runni Fakenham Road. This will be linked to the pole via Manor Farm. The service is encrypted for security.

What's different from my existing internet service?

Rapid Waters would be the internet service provider with a 24 hour/day and 7 day/week technical support.. No line rental is required annual contract. There will not be a need for a broadband code(MAC code) to migrate to this service - just cancel any contract with broadband provider (although charges may apply)- if you have one!

Who can get this service?

Most people in Lyng and the immediate area around will be able to get it. They need to be able to get a 'line of sight' connection to a p on the rising ground between the School and Heath Road.. This line of sight is from a receiver 30cms x 9cms which can be attached t support on your house, or to the wall near your roof. If you are not in line of sight, you may be able to receive a signal indirectly from a r The installer will check to see if you can receive a good signal.

How much does it cost?

Equipment and installation will cost £88.33 (including a router) and the monthly fee is £13.32

Telephone services can be provided if requested without the BT line rental.

Terms and conditions are included on the application form.

Above exclusive of VAT and based on a 12 month contract.

Is it different from my current service?

The only difference, is speed!

Who runs the service?

Rapid Waters Ltd

What do I need to do?

If you want the service email your details now to - lyng4broadband@gmail.com

Broadband speed test* available at <http://www.broadbandspeedchecker.co.uk/#> which puts you on a map allowing comparisons of landline download/upload in the area!

To do this start the speed test until dials read 0 and a new menu appears on the righthand side, then click on 'See results in your area' tab, complete browser details and postcode. Finally click red tab - 'Show speeds..' and your speed will appear on the map.

* only applicable to landlines
